

Change in phone and fax numbers for Early Intervention Physiotherapy

Dear Colleagues,

Effective immediately, the phone and fax numbers for the VCH early intervention physiotherapy program have been changed, as reflected on the enclosed referral form. Please replace all old referral forms with the one attached.

We welcome referrals for children with gross motor concerns or who are at risk for gross motor developmental delay, aged 0 – 5 years. We provide physiotherapy consultation to the Infant Development Program on the North Shore and collaborate with early intervention Occupational and Speech Language therapists within the region. Please see the attached copy of our referral form. Please fax completed forms to 604-913-0084.

Thank you for your continued partnership in promoting maximal early development in infants and preschoolers.

On behalf of Jean Fan, BScPT, MSc & Wendy Phillips, BScPT, Physiotherapists.

Sincerely,

Brian A. O'Connor, MD, MHSc
Medical Health Officer
Vancouver Coastal Health, North Shore

Encl.
